

If a student is applying to any selective admissions program for the Fall 2024/Spring 2025 academic year and that student completed the Fall 2023/Spring 2024 academic year math requirement for that selective admission program by the end of the Fall 2023 term, with a qualifying grade, the student will meet the admission requirement only for the Fall 2024/Spring 2025 cycle.

For Example: Math 137 will satisfy the admission requirements for selective admission programs and corresponding science courses for those students who completed Math 137 with the required grade by the end of the fall 2023 term.
